

POP ART your photographs

- 1) Open photograph in Adobe Photoshop.
- 2) Your Layers and History Windows Should be open. (Go to *WINDOW- LAYERS* and *WINDOW- HISTORY IF NOT*)
- 3) Make Adjustments (*Image- Adjustments- Levels*) so you have good contrast

4) **CLICK on the half black and half white circle at the bottom of the Layers Window OR** Click on the THRESHOLD Adjustment Layer
Choose **Threshold** from the menu. **Move the slider** around until you see important details

5) **CLICK on the BACKGROUND Layer** in the Layer's Window. **GO to LAYER- DUPLICATE LAYER. NAME** this layer **Burn/Dodge.**

Use the **Burn tool** in the toolbar to darken areas or bring out more shadows and details from your photo.

CHANGE the EXPOSURE at the top to **15%**

CHANGE the brush SIZE (MASTER DIAMETER) depending on the area you are burning.

Use the **Dodge tool** (located under the Burn tool- click on the burn tool and hold) to lighten the dark areas

CHANGE the EXPOSURE at the top to **15%**

CHANGE the brush SIZE (MASTER DIAMETER) depending on the area you are Dodging.

Increase the exposure to dodge quicker. **Work slowly, to get the best range of shadows, midtones and highlights to accentuate the details in your photo to create expression and mood.

ADDING COLOR

CREATE A NEW LAYER-GO to LAYER- NEW- LAYER at the top of the screen or CLICK the PAPER at the bottom of the layers window

NAME this layer **COLOR** and change the MODE to **MULTIPLY**.

****Drag this layer to the top of the Layers.**** USE the Eraser tool to delete color.

1. **USE BRUSH TOOL.** Color ONLY on COLOR LAYER.

Don't leave a lot of white areas. Increase and decrease the Opacity to create Values. Use your history palette to go back a step. Use bright, bold colors like the Pop Artists.

2. **Use the SHAPE TOOLS – RECTANGULAR TOOLS.** Choose a color and click and drag to create the shape. It will appear as if it is on top of your image until you **CHANGE THE MODE** to **MULTIPLY**

3. **SELECT** certain areas of your photograph (using a selection tool but make sure the background layer is highlighted when you do this)
4. USE the **GRADIENT TOOL** to add a gradient in your selected areas (MAKE SURE YOU RETURN TO THE COLOR LAYER or ADD a New Layer)
5. Use the Magic Wand to select certain colors (select multiple colors by holding down the shift key while clicking on the different colors)
6. USE **different filters** to add interest and texture.

Make sure you are in the color layer while doing this.

IN order to COPY a COLOR

11) USE the **eyedropper tool** from the tool bar. Click on the color you desire and that color will appear in the box in the tool bar. You can then paint/draw with that color.

Make any final adjustments and then save your photograph as a PSD with all the layers. Then Flatten the Image (Go to *Layer-Flatten Image*) and save the image to your POP ART FOLDER as a .jpg
